Note:

--Factors are listed from most to least influential for the 'Child does not walk/bike to school' group.

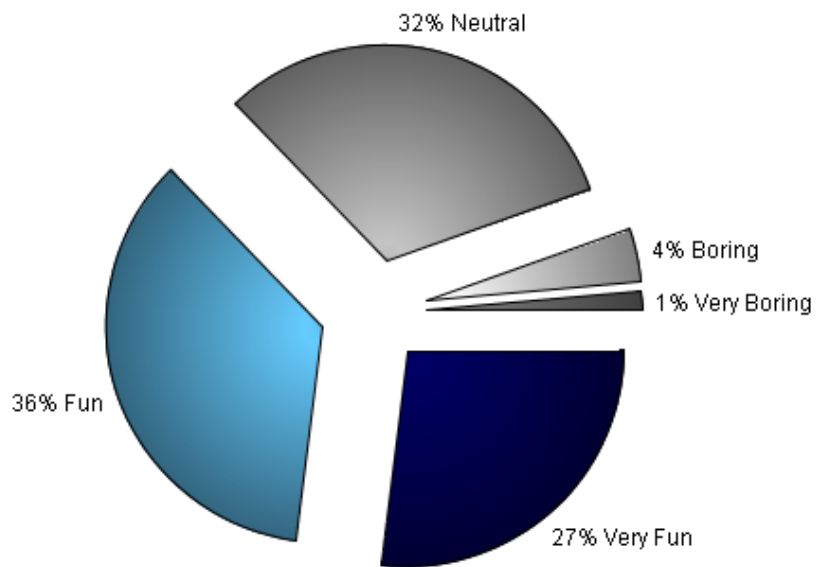

--Each column may sum to > 100% because respondent could select more than issue

--The calculation used to determine the percentage for each issue is based on the 'Number of Respondents per Category' within the respective columns (Child does not walk/bike to school and Child walks/bikes to school.) If comparing percentages between the two columns, please pay particular attention to each column's number of respondents because the two numbers can differ dramatically.

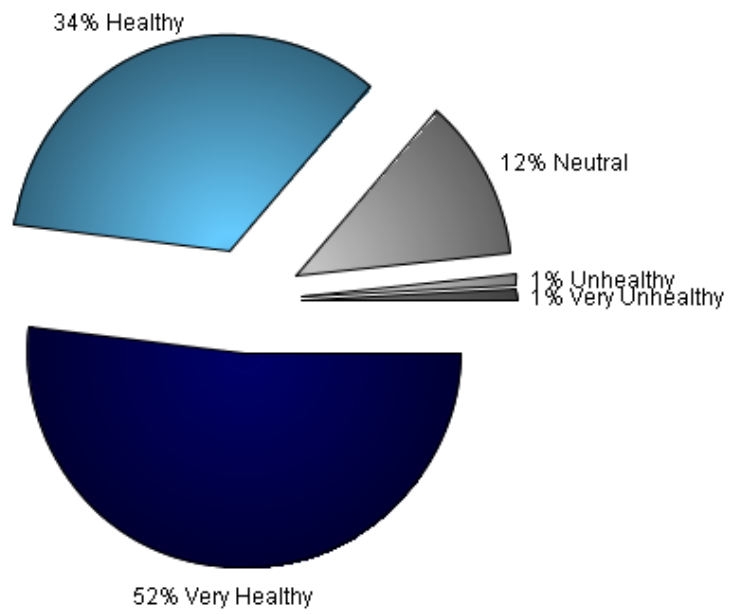

**Parents' opinions about how much their child's school encourages or discourages walking and biking to/from school**

**Parents' opinions about how much fun walking and biking to/from school is for their child**

**Parents' opinions about how healthy walking and biking to/from school is for their child**

## Comments Section

SurveyID	Comment
542873	In a group im fine with it. Alone i am not.
542899	No Comment.
542914	Have to also transport older sibling to highschool. Availbe parent cannot walk excessively due to foot handicap.
543027	Intersection of Noriega and 36th Ave is extremley dangerous! Cars are always making illegal and unsafe u-turns. Turn right from sunset, U-Turn @ 36th then go gown Noriega. A sign preventing this should be in place.
543039	If kids would be assigned to their neighborhood elementary school or middle schools we could solve this problem?
543044	We really enjoyed the bike to school day and wish we would bike more.
543076	Our 2 kids are too young to walk/bike to school on their own.If time wasnt an issue we would try biking. Also not certain bikes are able to be secured properly at school.
543175	We do not live in the neighborhood and biking up our hill where we live is next to impossible for most.
543181	I would like to encourage my child to ride but the streets do not have enough bike lanes or protected roadways.
543371	We walk and Bike Alot- Just not to school due to distance.
543517	We would definitely walk & bike to school if we lived closer.
543518	Fill the entire box are correct answer. Sorry for not reading the instructions correctly.
543534	We walk once a week or bike. If traffic was less threating and there were more crossing guards we would definately walk more.
543542	Sunset Elementary needs crosswalks and crossing guards directly in front of the school on Ortega Street at 40th Ave.
542853	We really enjoy biking when we can to school. Mr Riley and the bike to school event really inspired us to bike more!
542863	Kidnap or perps exposing and bullies.
542889	A stop sign at Moraga and 40th Ave would help with biking to School.
543073	I would never allow my child to walk or bike through unsafe routes or neighbors. Safety is major factor.
543078	Going to the school in a group with adults is a possible soultion.
543166	Nothing against sunset elementary school but if my child was guaranteed to go to Ulloa Elementary school which is one block away we would definitely walk to and from school.
543381	We sometimes pick up our children from school on bikes.
543454	There are no bicycle racks that I have seen at Seunset Elementary. It appears no one rides their bikes to school.
543473	Would love to promote bike to school but the concerns we have are as follow. School does not have proper bike rack/bike station to lock the bikes. 2. Car traffic on the road is quite fast, difficult to just let the student bike to school on his/her own.
543549	We live very close but need to drop off sibling at pre-school first,so we dont walk/bike to school.
542927	Where would my child park the bike in school???
543017	Where would my child park there bike in school?
543385	I would not allow my child to bike to school unless there was a bike lane an adult chaperone. I would not allow my child to walk to school unless there was an adult chaperone. My number one concern is child abduction.
543536	We live too far away from school for our elementary school children to walk or bike to school.
543048	Because of a busy work sechdule and distance to school it would not be fesible to walk/bus to school.

543068	As healthy as walking to school might be asking children in elementary school to walk to school alone just isnt safe due to irresponsible drivers who don't stop/slow as well as due to kidnapping. I support walking to school with an adult chaperone, provided that they have the time. Working parents do not have that option.
543155	Since the school is kinda far away and I don't feel comfortable crossing 19th Ave/Sunset Blvd.
543194	Eventhough everyone encourages kids to ride there no place for locking bikes.
543483	None
542903	Biking is great but when shes going to school. Having fun with our family is when we bike on the weekend.
543029	The earliest kids could walk along to school need at least in middle school. Otherwise, I prefer always to walk with company.
543513	Proximity to school is everything. I wish we lived closer but it hasnt turned out that way. We try to recreate (walk 7 ride) near our childrens grandparents house.
543373	Sunset Elem to Ortega and 24th is a very steep hill down and back up. Its not safe to bike it esp at elementary age. Walking to school is possible but walking home is too far uphill for the boys in our family at this age.
543033	Child Prefers to walk with other classmates but not alone.
543147	We live too fsr from school to consider walking or biking.
543368	The primary reason we don't walk/bike to school is the distance and it would be very dangerous because there is so much traffic for our route to school if we were at sloat we would walk/bike all the time.
542924	I would not allow my child to take himself to his current school because 1) Too young, 2) Too Far. I would begin to allow my child to go to/from school alone perhaps in middle school.
