

Parent Survey Summary

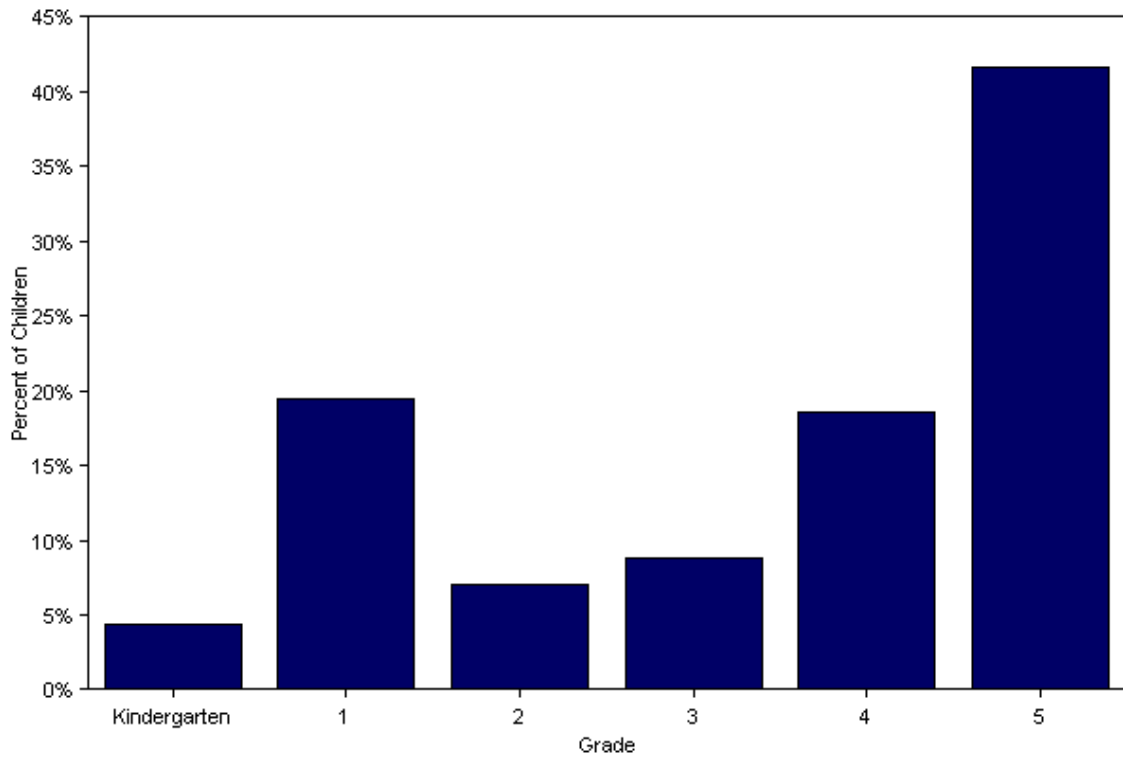

Program Name:	San Francisco Department of Public Health	Month and Year Collected:	May 2011
School Name:	Buena Vista Elementary School	Set ID:	5576
School Enrollment:	372	Date Report Generated:	06/07/2011
Enrollment within Grades Targeted by SRTS Program:	372	Number of Questionnaires Analyzed for Report:	114
Number of Questionnaires Distributed:	372		

This report contains information from parents about their children's trip to and from school. The report also reflects parents' perceptions regarding whether walking and bicycling to school is appropriate for their child. The data used in this report were collected using the Survey about Walking and Biking to School for Parents form from the National Center for Safe Routes to School.

Sex of children for parents that provided information

Grade levels of children represented in survey

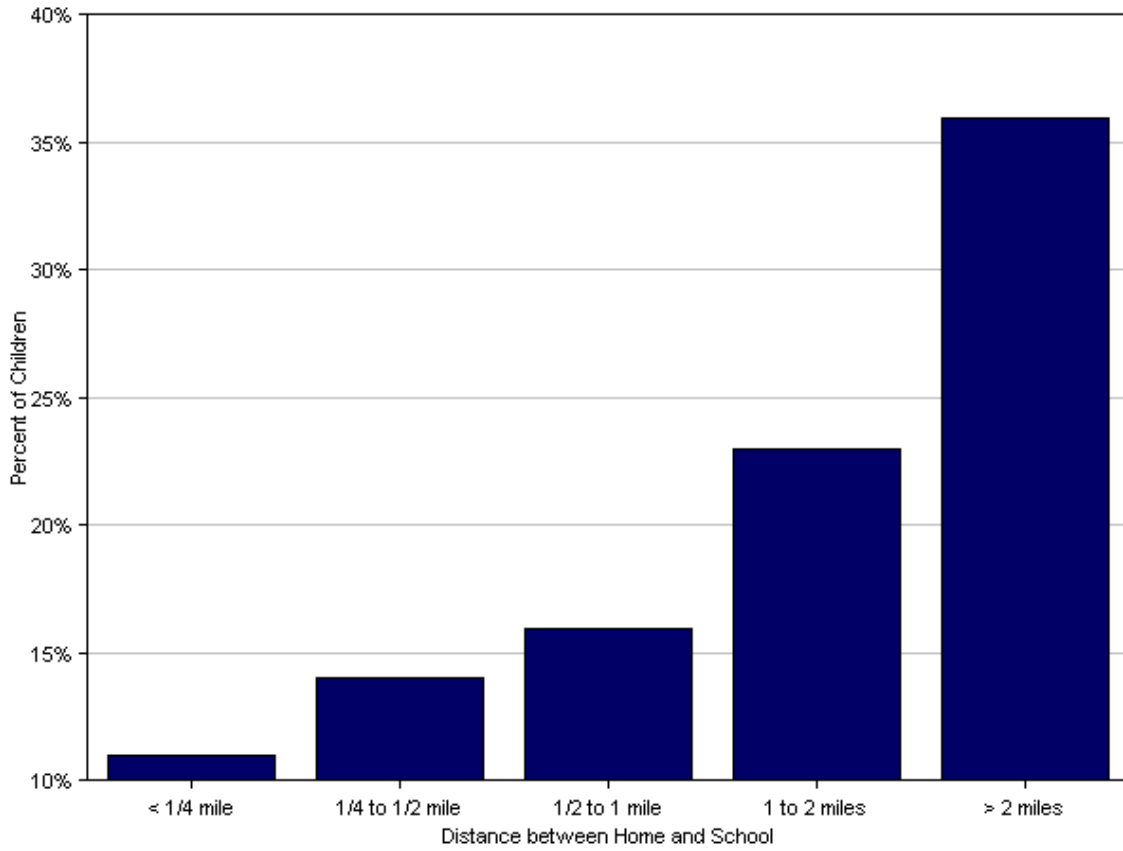

Grade levels of children represented in survey

Grade in School	Responses per grade	
	Number	Percent
Kindergarten	5	4%
1	22	19%
2	8	7%
3	10	9%
4	21	19%
5	47	42%

No response: 0

No response: 8

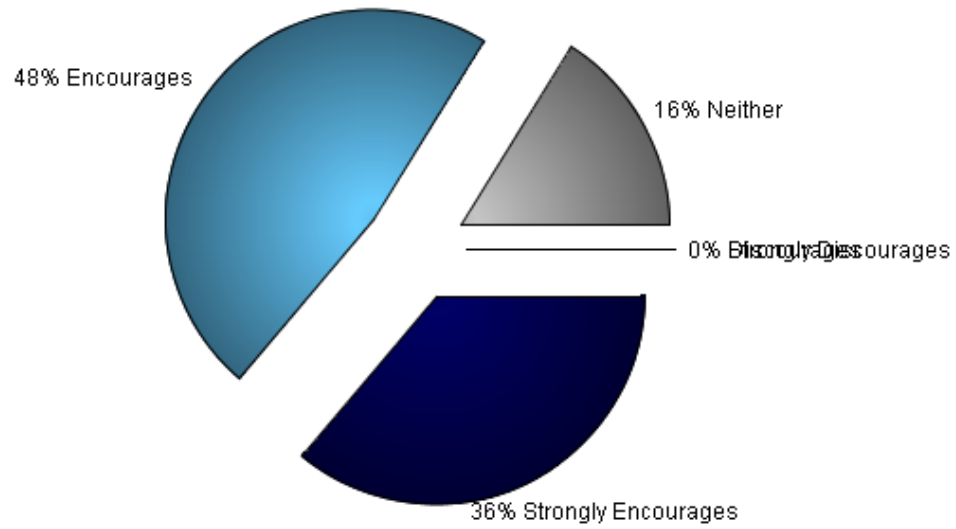

Note:

--Factors are listed from most to least influential for the 'Child does not walk/bike to school' group.

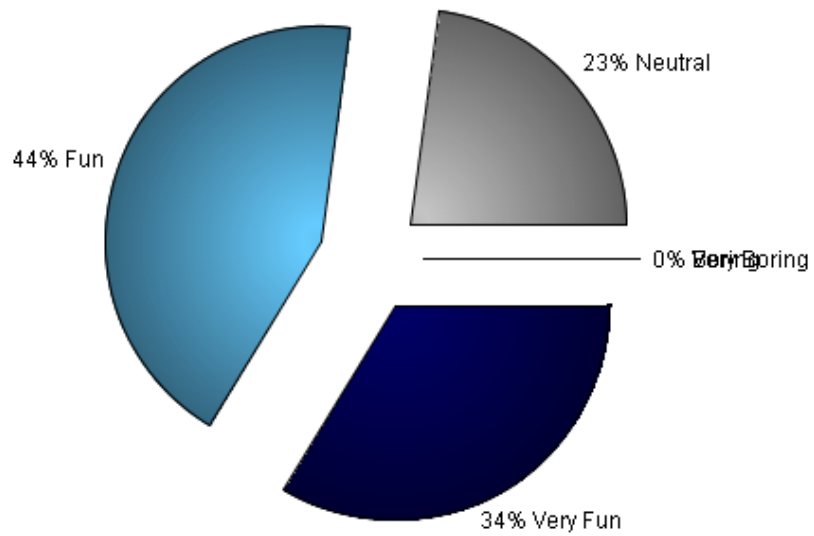

--Each column may sum to > 100% because respondent could select more than issue

--The calculation used to determine the percentage for each issue is based on the 'Number of Respondents per Category' within the respective columns (Child does not walk/bike to school and Child walks/bikes to school.) If comparing percentages between the two columns, please pay particular attention to each column's number of respondents because the two numbers can differ dramatically.

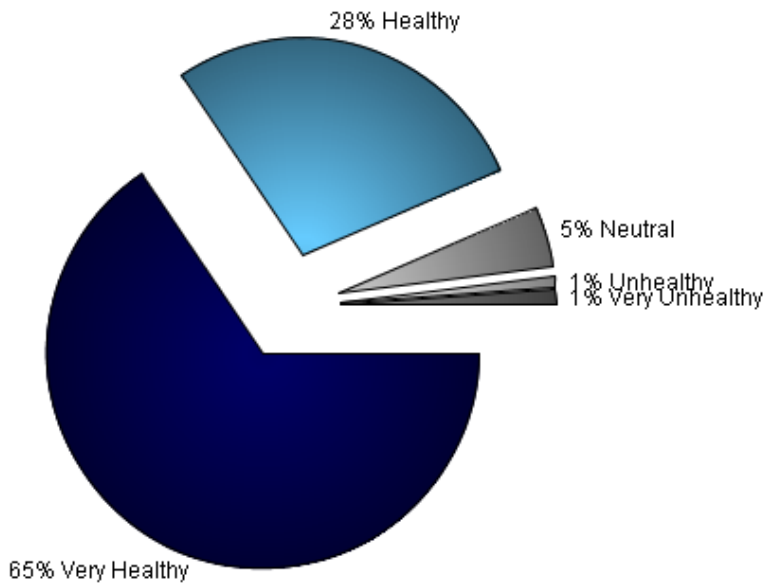

Parents' opinions about how much their child's school encourages or discourages walking and biking to/from school

Parents' opinions about how much fun walking and biking to/from school is for their child

Parents' opinions about how healthy walking and biking to/from school is for their child

Comments Section

SurveyID	Comment
619931	We would like to bike to school - challenges are safety crossing streets when we ride on the sidewalks, and there is no bike lane on the street. Bike lane would help!
619979	I cannot walk my child as regularly as I want because I am disabled and i have a difficult time walking long distances
620000	When we drive it is because of time or because I am coming from a place other than home to pick her up.
620001	I would always accompany my child or have an adult with them. The only reason we do not walk or ride is a distance/time issue.
620005	For question 10 & 11, I marked answers contingent on my child biking/walking alone. We already bike/walk to/from school, but do think efforts should be made to make the routes safer and provide more places to lock up bikes
620063	The only reason our kids don't walk or bike to school is distance from our home
620717	I like the questions
620753	I would like it if my children rode a bike but because of my work, I can't
620762	I would be more inclined to ride a bike if there were more crossing guards at intersections.
619918	My 4th grader walks or bikes to school at least once per week. My 6th grader walks most days
619999	Need more biking to school days
620027	Traffic is too bad around the school
620707	There needs to be more safety measures because there are people who drive very aggressively and our children are not very safe.
620710	It's not safe to ride a bike to school in our area because of the traffic but if there wasn't so much traffic I would ride a bike to school.
620716	The streets to get out of the Bayview are awful! You can only get out of the Bayview to the North by Evans, 3rd ST. Jerrold or Industrial. None of these streets are safe or pleasant. Please contact Malia Cohen (Dist 1 Supervisor) to change that!
620725	Riding a bike is very healthy but we live far and it's dangerous around here. We hope that families that live nearby ride together - that would be nice and fun. Carry on!
620736	I support the idea of walking and biking to school but the school is far from our house and the streets are very traffic-y.
620756	I want to thank those who had the inciative to create this program and for continuing to encourage families to participate and offering them support.
620760	I would like to take my son to school on a bike but I can't because of my work schedule. I need to drop him off early to daycare and then take to his soccer practice after school.
620768	Walking and biking is very healthy for children and everyone, but the city is very congested with traffic and at time, it is dangerous. Thank you.
620786	The people that watch the crosswalk in the mornings and afternoons need to pay more attention because they don't always see them cross.
619981	She is 7, I also have to take her sister to daycare and I have to go to work after.
619938	More than violence and crime there
619970	I feel that adult supervision is required for these activities. It is not safe for young children to commute to school walking or bikning by themselves.
620029	Although we mostly drive, we walk, bike or scooter on average 2 times per week.
620076	I can't let my son walk or ride a bike to school alone because I want to make sure that he arrives safely without any problem.

620712	I would like it if the next time that this survey is sent home that you inform me what the information is being used for. Thank you.
620073	Next year we are going to walk or ride the bus to/from school. It will be closer and the route is safer. But, alone? I don't like that idea. Perhaps in groups of children.
620763	I think it is not convenient to walk, ride a bike or rollerskate because of traffic.
620002	Distance makes it impossible for anything but driving. When we lived near the school, we walked everyday.
